Summary

Computer Science student and passionate Full Stack Developer with hands-on experience building scalable, user-friendly web applications using the MERN stack (MongoDB, Express.js, React.js, Next.js, Node.js). Skilled in developing high-performance backends with Node.js and Express.js.

Experienced in working with RESTful APIs, authentication (JWT/OAuth), database design, and cloud deployment on platforms like AWS, and Netlify. Strong foundation in clean code practices, Git/GitHub version control, and Agile collaboration.

Key achievements:

- **National-Level Hackathon Winner (Rank 1)**

Secured 1st place among 50+ teams nationwide at the Build With Gemini Hackathon, hosted at the University of Delhi, sponsored by Google, Unstop, and PhysicsWallah. Collaborated with a cross-functional team to design and deliver an innovative, production-ready solution under competitive conditions. **LinkedIn**

- **Hackathon 3rd Runner-Up (Team Collaboration & Innovation)**

Achieved 3rd Runner-Up among 30 teams in the "Innovate or Evaporate" 24-hour Hackathon, organized by the Department of Computer Science & Engineering, Tula's Institute, Dehradun. Contributed to ideation, development, and final presentation within a high-pressure, time-bound environment. **LinkedIn**

- **Competitive Programming Recognition (Unstop Weekly Challenge)**

Secured 143rd rank in Unstop's Weekly Coding Challenge (Challenge 46) and earned a Certificate of Excellence, demonstrating consistent problem-solving skills and algorithmic thinking. **LinkedIn**

CERTIFICATIONS

- Programming Data Structures and Algorithms using Python | **NPTEL Online Certifications** - **Link**
- Software Engineering | **NPTEL Online Certifications** - **Link**
- Cloud Practitioner (AWS) | **ICT Academy** - **Link**
- 5-Day AI Agents Intensive Course with Google | **Kaggle** - **Link**
- E-Cell, IIT Bhubaneswar campus ambassador - **Link**
- Certificate of participation | **Intel Corporation** - **Link**
- The Full Stack | **Meta** - **Link**
- Machine Learning with Python | **IBM** - **Link**
- Introduction to Software Engineering | **IBM** - **Link**
- AI-ML workshop certificate | Tula's Institute - **Link**

Skills

- **Web technologies**: HTML5**,** JavaScript, TailwindCSS, REST APIs, Firebase, Next.js
- **RIA frameworks**: React, ROS (Robot Operating System, Automation Tools (general)
- **Version control**: Git
- **Programming Languages**: Python, C++, Java
- **Databases**: MySQL, PostgreSQL, Node.js, Express.js, MongoDB, Convex
- **CI/CD**: GitHub Actions (basic / learning) AWS (deployment & hosting)
- **Operating Systems & Platforms**: Linux / UNIX, AWS
- **Backend Frameworks**: Django, Flask, Supabase
- **API & Testing Tools**: Postman
- **Machine Learning & AI**: Machine Learning (ML), Azure Computer Vision (OCR)
- **CORE CS CONCEPTS**: Data Structures & Algorithms, OOP, Debugging, Unit Testing

Experience/Projects

Clario – AI-Powered Career Guidance Platform Linkedin Oct - Nov 2025

- Built a full-stack AI-powered career guidance platform featuring personalized career assessments, LLM-generated learning roadmaps, interview preparation, and secure role-based authentication for students and mentors.
- Integrated Azure Computer Vision (OCR), Google Gemini, and LangChain to extract structured data from resumes and academic documents, automate student profile creation, and deliver personalized career recommendations.
- Developed scalable backend APIs with Redis caching and rate limiting, enabling real-time mentor connectivity, high-concurrency support, and a cloud-native architecture for reliable data management.

Full Stack Development Intern Linkedin June – July 2025

- **Shrishivom Technologies Pvt. Ltd.**
  - Completed a 5-week Full Stack Web Development internship with hands-on experience in frontend development, backend APIs, and database integration.
  - Contributed to feature development using modern web technologies, following coding best practices and collaborating effectively in an agile team environment.

- **VRSA ANALYTICS PVT LTD** Linkedin June – Aug 2025
  - Developed full-stack web application features by building responsive UIs, backend services, REST APIs, and database integrations while contributing to feature development, testing, debugging, and delivering maintainable solutions following industry best practices.

Junior Frontend React Developer

- **SmaranAI.in** Linkedin May 2026
  - Developed and maintained React.js frontend components by identifying, debugging, and resolving 50+ UI/UX, state management, responsiveness, and performance issues, improving application stability and user experience through comprehensive QA testing.
  - Reconstructed the backend using Supabase by designing a relational database schema (10+ tables), implementing Row-Level Security (RLS), triggers, RPCs, Google OAuth authentication, and deploying Edge Functions for secure, scalable application functionality.

Summer research project | Research intern May – July 2025

- **The LNM Institute of Information Technology, Jaipur**

- Working under Dr. Bharat Verma to design and simulate a twowheel gyroscopically stabilized robot in Gazebo using ROS Noetic.
- Developing a control algorithm combining PID and Reinforcement Learning for real-time balance correction.
- Building the simulation environment from scratch using Python and Ubuntu-based ROS setup.
- Gaining hands-on experience in robotics, control systems, and intelligent agent training

KINDBITE | AI + IOT smart food waste monitoring & redistribution system April 2025

- **Team Project | Link**

- Built a smart bin system integrating sensors, AI models, and Django REST to detect surplus food, assess quality, and match NGOs in real-time.
- Developed responsive dashboards using React & Tailwind CSS, integrated IoT hardware (ESP32, sensors) with Firebase, and tested endpoints via Postman.

LAKSHAGRIHA HACKATHON April 2025

- **HACKATHON**

- Developed an IoT-enabled RC boat using ESP32 to monitor water quality (pH, TDS, temperature), with live data sent via Wi-Fi to Blynk/Firebase.
- Enabled remote navigation and real-time impurity detection for affordable mobile environmental monitoring.

Ecotrack | AI tool to predict CO2 AND CH4 emissions Feb 2025 – March 2025

- **Techathon Project**

- Developed a web- based AI tool to predict CO2 and CH4 emissions using regression models.
- Deployed the model with Flask API, added optimization to suggest strategies reducing emissions by up to 18%.

Environment & Tools: ReactJS, Bootstrap, VS Code, Chrome Dev Tools, MySQL, PostgreSQL. Firebase, Supabase, Node.js, CSS, Linux / UNIX, Windows

Education

BE: TULA'S INSTITUTE	Current CGPA: 7.43 / 10	2023 - 2027
Allen(JEE Advanced) :		2022 - 2023
Samaritans English Medium Higher Secondary School		2021 - 2022
St. Mary's Convent Higher Secondary School		2017 - 2020

Projects: Clario, Kindbite, Ecotrack

Languages
English, Hindi
